The communication dated has been received and the claimed invention has been reconsidered with the following results:

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31, 42-63, drawn to a particular objective lens or an optical pickup having a particular objective lens, classified in class 369, subclass 112.23.
 - II. Claims 32-35, drawn to an optical pickup having an aberration detecting/correction unit for correction an aberration cause by the thickness of an optical disk, classified in class 369, subclass 44.32.
 - III. Claims 36, drawn to an optical disk, classified in class 369, subclass 272.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, at least claims 1, 14, 42, 48, 53, 59, 60 and 62 in invention I are evidence that particular invention I has separate utility such as without the use of an aberration detecting-correcting unit. See MPEP § 806.05(d).
3. Inventions I-II and invention III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination

Art Unit: 2653

as claimed because at least claims 1, 14, 42, 48, 53, 59, 60 and 62 are evidence that the patentability of the combination does not rely on the details of the specific subcombination.. The subcombination has separate utility such as carry data with high capacity.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thang V. Tran whose telephone number is (703) 308-1551. The examiner can normally be reached on Tuesday to Friday, from 7:30AM to 6:30PM.
